As CMO (Chief Medical Officer) of the U.S.S. Storm NCC-1694 will be implementing new and upcoming ways to curb the original aggressive tendencies of certain life forms to insure an added cohesiveness to our ships overall efficiency in daily operations.

Along with curbing these natural urges will be courses such as the time honored tradition of anger management. We will be trying to attempt all of these endeavors without the use of medications as have been proven to fail in the years past.

As a founder who was discovered and raised by the Betazed community I am living proof that all natural aggressive/violent tendencies can be curbed. This has been proven to assist me with empathy for my fellow life form and has assisted me with my current position in Star Fleet.

AT this time there is talk about going to see the Air and Space museum at the Smithsonian some time this fall.

Uniform designs have been chosen by Capt. David. We are awaiting comments from the rest of the crew before ordering proceeds.
